Keysight Technologies Bench and System Switching Products

Choose Keysight for Confidence in your Switching and Measurements

Keysight system and bench instruments surrounding your DUT

## Integrate Confidently. Switch Confidently. <br> Measure Confidently ...only with Keysight

Whether you use switching to route signals for design verification applications or for complex automated functional test systems, reliable and repeatable switching is critical for your measurement accuracy. Keysight Technologies, Inc. switching ensures confidence in your measurement results.

- Reliable signal routing from DC to 67 GHz
- High quality, durable connections to your device under test
- Switch management features such as relay counters, switch verification and switch sequencer
- Compact, cost effective LAN, GPIB and USB solutions

## 34970A Data Acquisition/Switch System

## Dedicated data-acquisition performance at PC plug-in prices

- Three-slot mainframe, choice of 8 plug-in modules
- Up to 60 2-wire mux or 962 -wire matrix cross-points in one mainframe
- Built-in DMM with $61 / 2$ digits ( 22 bits) of resolution
- Scan rates of up to 250 channels/second
- Measures and converts 11 different input signals:temperature with thermocouples, RTDs, and thermistors; DC/AC volts; 2and 4-wire resistance; frequency and period; DC/AC current
- Includes BenchLink Data Logger software to configure and control tests, display results and move data for further analysis

## Options and Accessories

- Option 001 Delete Internal DMM
- Option 1CM Rack mount kit
- $\quad 34307 \mathrm{~A} 10-\mathrm{pack}$ of J-type thermocouples
- 34308 A 5 -pack of $10 \mathrm{k} \Omega$ thermistors

Included BenchLink Data Logger software makes it easy to capture data for further analysis.

## Keysight 34830A BenchLink Data

Logger Pro allows for advanced data logging and decision making without programming

## 34980A Multifunction Switch/Measure Unit

Flexible, reliable switching and data acquisition system in one compact, economical box

- Eight-slot mainframe, choice of 21-plug-in modules
- Up to 560 2-wire mux or 4096 matrix cross-points in one mainframe
- Built-in DMM with $61 / 2$ digits ( 22 bits) of resolution
- Scan rates of up to 1000 channels/second
- Standard LAN, USB, and GPIB connectivity to PC
- Easy remote access with built-in Web interface
- Priced up to $40 \%$ less than comparable module solutions in VXI or PXI
- Includes BenchLink Data Logger software to configure and control tests, display results and move data for further analysis

| 34952 A | Multifunction module with 32-bit DIO, 2-ch D/A and totalizer | Four 8-bit digital I/0 channels, two $\pm 12-\mathrm{V}$ analog outputs, and a 100 kHz gated totalizer |
| 34959 A | Breadboard module | Create your own custom designs with +12 V and +5 V supplies, 16 GPIO and 28 relay drive lines |

Keysight 34832A BenchLink Data Logger Pro software allows for advanced data logging and decision making without programming.

## L4400 Series LXI Switching and Control

High-performance switching and system control in a compact, selfcontained LXI instrument

- LXI Class C Compliant
- Small, 1U, half-rack size
- Built-in Ethernet connectivity
- Fully-featured graphical Web interface
- Standard Dsub connectors for flexible connection options
- Software drivers for most common programming environments

## Models and Specifications

| Model | Description |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
| 14400 Series | A broad range of functionality to meet a wide variety of applications needs in design verification, automated test and data acquisition |  |  |  |

| L4445A | Microwave Switch/Attenuator Driver | Drive up to 64 external switch coils; 32 SPDT switches, 8 multiport switches, 8 attenuators, or custom combination |  |  |
| System Measurement and Control |  |  |  |  |
| L4450A | 64-Bit Digital I/O with Memory and Counter | Eight 8-bit digital I/O channels with programmable polarity, thresholds up to 5 V with handshaking protocols and 128 kbytes pattern memory. Two 10 MHz frequency counters and programmable clock output |  |  |
| L4451A | 4 Channel Isolated <br> D/A Converter with Memory | Output DCV up to $\pm 16 \mathrm{~V}$ or DC current up to $\pm 20 \mathrm{~mA}$, output waveforms w/200 kHz update rate and 16 bit resolution. 500 k memory for waveform clock output |  |  |
| L4452A | Multifunction | Four 8-bit digital I/O channels, 2 Channel $\pm 12 \mathrm{~V}$ analog outputs, 100 kHz gated totalizer |  |  |

Web interface makes it easy to set up, troubleshoot and maintain your test remotely

## Options and Accessories

- Option GPIB adds GPIB interface
- Option OBO deletes printed manual set, full documentation included on CD ROM
- Option ABA printed English manual set
- $349 x x T$ terminal blocks for connections
- Y1160A rack mount kit
- Y1135A - Y1142A twisted pair cables \& connector kits

## USB Switching \& Data Acquisition

Flexible choice for data logging, measurement or monitoring in a broad range of industries

- Standalone and modular capabilities
- Up to $3 \mathrm{MSa} /$ s sampling rate (single channel; U2331A)
- Up to 384 channels when used in U2781A chassis
- Powerful analog and digital triggering capabilities
- 24-bit programmable digital I/O
- Plug-and-play installation and configuration
- High-speed USB 2.0 (480MBit/s)

## 3499 Switch Family

The Keysight 3499 gets high marks in ATE environments worldwide

- Affordable, scalable switching platform with 21 modules to choose form
- 2, 5 and 14-slot Mainframes
- Intuitive, self-guiding front panel interface
- Scan up to $350 \mathrm{ch} / \mathrm{sec}$
- GPIB and RS-232 interfaces
- Built-in Digital I/O

## Models and Specifications

## PXI Switch Modules

## Experience fast reliable switching in a variety of configurations

Select from General Purpose, Matrix, Multiplexer and RF Switch modules for your switch test system. Add Digital I/O to your test system with the M9187A module.

- Optional connector blocks and cables
- Software driver support the most common programming environments (IVI-COM, IVI-C, LabVIEW)
- Soft front panels
- Keysight connections expert

## M9018A 18 Slot PXIe Chassis

- Advanced PCle switch fabric that operates up to Gen 2 speeds and provides twelve $x 4$ and four $x 8$ links to module slots
- Backplane speeds of up to a $4 \mathrm{~GB} /$ s data rate from external controller to PXIe module slots
- Innovative cooling design that allows chassis to fit into 4 U of rack space in most cases

## General Purpose PXI Switch Modules

- Up to 100 channels or amature relays
- Power relay module switches heavy loads with up to 300W (DC resistive load)/125W (AD resistive load)

## Matrix PXI Switch Modules

- Up to 256 2-wire crosspoints
- High-speed, long-life reed relays or higher power armature relay

## Multiplexer PXI Switch Modules

- High-speed, long-life reed relays or higher power armature relays
- Modules operate in break-before-make mode
- Up to 128 channels in a single module

## RF PXI Switch Modules

- Modern RF relay technology delivers low insertion loss and VSWR
- Reliable switch path design for repeatable RF performance

## Digital I/O PXI Modules

- 32 input channels and 32 output channels
- 100 V input protection and fully protected outputs

## PXI Switch Modules

## VXI Switches

A wide choice of modules for when you need high-performance, high-density switching

- Modular architecture allows for high-performance signal connections in the same platform as your VXIbus-based signal stimulus and measurement instruments
- Easily configured to over switching 3,000 channels
- Scan up to $13,000 \mathrm{ch} / \mathrm{sec}$
- Wide selection of modules including multiplexers, general purpose, matrix and RF/Microwave switching
- GPIB and Firewire interfaces

A pice of small debris is stuck on the surface of center conductor

Debris is wiped from the surface

Guaranteed Performance
$<0.03 \mathrm{~dB}$ insertion loss repeatability guaranteed for 2 or 5 million cycles

Long Operation Life
5 or 10 million cycles (typical)

## Flexible Configurations

- SPDT,SP4T,SP6T
- Bypass and transfer
- Terminated and unterminated

## High Isolation

Typically > 85 dB at 26.5 GHz

## Low SWR

Minimize measurement uncertainty

## Unique Design

Wiping action mechanism eliminates particle buildup to ensure reliable switching

Broad Frequency Range
DC to 4, 20, 26.5, 40, or 50 GHz

## Solid State Switches

High speed, long life solid state switches to 50 GHz

## Switch Drivers

Completing your switch solutions with switch drivers

- Flexible, standalone switch drivers
- Quickly and easily connect to your switches
- Control from just a few to over 256 high frequency switches
- Use on the bench or in an ATE environment
- LAN, GPIB and RS-232 interfaces

## L449XA RF Switch Platforms

Shorten your custom switch matrix development time with a robust, reliable solution

- Flexible and easily configurable switch mounting system for a robust and reliable signal routing system
- 3D models for quick layout and documentation of RF switches and cables
- Graphical Web interface for quick setup, troubleshooting and support
- Easy connection and control of all the most popular microwave switches and attenuators
- Effective switch management with user-defined sequences, relay counter, exclude lists, and switch closure verification
- Software drivers for all the most common programming environments
- LXI compliance includes Web interface and built-in Ethernet connectivity

## Models and Specifications

The L449xA RF Switch Platforms provide the tools for Engineers to build their own custom switch solution. These platforms include power, switch drive control and space to mount all the most popular switches, attenuators and other signal conditioning components.

## Options and Accessories

- Y1150A-Y1156A Distribution boards for routing control signals to RF/ $\mu \mathrm{W}$ switches and attenuators
- Y1170A-Y1175A Bracket/ribbon cable kits for mounting switches and attenuators in L4490A/91A.

L4491A RF Switch Platform configured as a 4 X 4 matrix

Easily service and replace components

## Custom Switch Solutions

Custom RF switch solutions from Keysight

- Aerospace/Defense and Wireless RF/microwave designed switching and signal conditioning solutions
- Deep expertise in RF/microwave instrumentation and measurement science
- Optimal solutions for switch matrices
- Cost effective solutions designed for specific applications
- Experienced system service and support

| Design parameters | Isolation, Insertion loss, VSWR, reliability and repeatability as well as serviceability |
| Switch control | LXI, SCPI over LAN, GPIB or custom |
| Connectors | All standard types (N, SMA, 3.5 mm 2.92mm, etc.) |
| Packaging | Rack mount, bench top, ruggedized/mobile <br> Custom front panel display available |
| Testing | Full RF path characterization |
| Documentation | Standard reference manual with test data, parts list and, and programming information comes. |

## Options and Accessories

- Custom or standard chassis enclosures
- Flexible or semi-rigid cables
- Available front panel options showing RF schematic with LED active path indicators
- Complete RF path characterization data (S parameters)
- Position read-back for automated systems
- Built in fault isolation capability
- Embedded calibration and calibration verification capability

## The Move is On.

More and more companies are moving their test systems to the LAN eXtensions for Instrumentation (LXI) platform. As test engineers have discovered how easy it is to create and reconfigure test systems with LXI, momentum for this new standard has grown worldwide.

## Using LXI to boost throughput in

 semiconductor manufacturingEvery millisecond counts when testing semiconductor devices used in cellular phones. For one multinational manufacturer, an LXI-based test system shaved
 2800 ms off the time required to test W-CDMA power amplifier ICs.

Now is the time to make sure your future test systems are LXI compliant. With the broadest selection of LXI instruments in the industry, Keysight will help you make the move. LXI delivers real benefits now, plus flexibility for the future.

LXI provides flexibility for testing automobile antenna amplifiers

LXinstruments recently built a system for testing automotive antenna amplifiers for a German automobile manufacturer. The LXI-based test system gave the car manufacturer the flexibility it needs to adapt to changing requirements.

New Keysight LXI Digitizers with high-performance front-ends and on-board measurements to save you time

The Keysight L4532A and L4534A 20 MSa/s LXI digitizers offer 2 or 4 input channels in a stand-alone LXI format. These New LXI digitizers feature individually isolated inputs with an A/D converter per channel to ensure accurate waveform acquisition and measurements.

- 20 M Samples per second
- 16-bit ADC Simultaneous sampling
- $\pm 250 \mathrm{mV}$ to $\pm 250 \mathrm{~V}$ Isolated inputs
- Standard 32 MS/Ch or Extended 128 MS/Ch memory
- On-board measurements
- Built-in Web Interface
- Gigabit LAN and USB interfaces
