RS Stock No.: 519-203

RS Professionally Approved Products bring to you professional quality parts across all product categories. Our product range has been tested by engineers and provides a comparable quality to the leading brands without paying a premium price.

Product Description

This line of modular drawers is suitable for storing a wide variety of products.

The composition consists of a polystyrene structure and drawers made of transparent styrene copolymer, a material with excellent characteristics such as resistance to corrosion by chemical agents and oils, scratches and shocks, and a remarkable rigidity.

The drawers, thanks to their tilting and removable opening, provide great versatility and accessibility; in addition, thanks to the wide range of available sizes, they are perfect for organizing a variety of components, from very small to large.

The modular system allows to stack the drawers on top of each other, through the use of frames in different sizes, or through sturdy shelves, that can be assembled in different sizes, and trolleys for mobile storage.

The drawers are equipped with tags for easy identification of the product contained, and available with an anti-tip stopper system.
