

# TECHNICAL DATA SHEET

## SA-2000 Solvent

### Description

SA-2000 is a vague scented, medium strong industrial degreaser, which dissolves most greases, oil, wax and asphalts. In normal cleaning processes, the solvent will not affect metal, glass, brickwork and a wide range of plastics and rubber products.

Evaporates quickly and leaves a clean and dry surface. Contains no corrosive ingredients, is non-conductive and leaves no residue.

Excellent for brake- and clutch parts, gears, tools etc. In addition, the SA-2000 is very suitable as cleaner prior to industrial glueing with industrial adhesives, e.g. cyanoacrylates and anaerobic adhesives.

### Properties

- medium strong degreaser
- non-corrosiv
- light aromatic
- repair and assembly
- penetrating effect
- evaporates quickly

### Application

**Note!** We recommend always to make tests on small areas, as some types of plastics as well as painted surfaces can be influenced.

# TECHNICAL DATA SHEET

## SA-2000 Solvent

### Technical and physical data

Article no.	15205
Packing	Aerosol
Content	600 ml
Weight	318 g
Propellant	propane/butane
Colour	clear/transparent
Odeur	Vague
Density	0,62 g/cm <sup>3</sup>
Watersolubility	Insoluble
Activator	replaceable
Wash down effekt	yes
Up-side Down application	yes
Base	Alcanes
Emptying rate	2,36 g/sec.
