

A lightweight glove with heavyweight protection

Dyflex® from Polyco is a lightweight, dextrous glove offering exceptional cut, abrasion and tear resistance.

This seamless knitted glove made with Dyneema® technology provides excellent protection, yet still offers an exceptional level of comfort. The glove has been designed to be close fitting and is anatomically shaped making it extremely flexible, thereby reducing irritation and hand fatigue when worn for long periods of time. The polyurethane palm coating provides additional protection and guarantees an assured grip in wet and dry conditions, whilst the back of the glove has been left uncoated to allow the hands to breathe and stay cool. The elasticated knit wrist keeps the glove in place and also prevents any dust and debris from entering.

Case Quantity
12 pairs per polybag
48 pairs per case

Typically Used For

- Component Handling
- General Assembly
- Electronics
- Tiling
- Ducting/Pipework
- Steel Handling • Glazing
- Automotive Manufacturing

Available in grey or white.
