

Logitech® USB Wheel Mouse

Award-winning comfort for USB systems

The Logitech® USB Wheel Mouse performs today and is ready for tomorrow. It works with your current Windows® system on the PS/2 port, and when you upgrade to Windows® 98 or a Macintosh® with a USB port, it helps you take full advantage of the new software features and the USB port.

Take advantage of the latest USB technology

The Universal Serial Bus (USB) is the most advanced way to connect mice, cameras, and other peripherals to your computer. With USB you can connect several different mice, so everyone who uses the computer is free to work with his or her favorite one.

The easiest installation

No matter how you connect USB Wheel Mouse to your system, installation's a snap. Plug it into the USB port without even needing to turn off your system. Or, plug it into the PS/2 port on any Windows system.

Never use scrollbars again

Logitech's scroll wheel gives you fast, easy scrolling in Windows®, Mac® OS and the Web. Just roll the wheel to move up and down on your screen, without having to move the mouse or click in scrollbars.

Designed to fit your hand

The contoured Logitech USB Wheel Mouse shape provides comfort and easy control whether you use it with your right or left hand. MouseWare® software makes it simple to use either the right or left button as your main click button.

Time-saving shortcuts

Logitech MouseWare already assigns popular step-saving shortcuts to the buttons, and lets you easily change the settings.

Logitech® USB Wheel Mouse

Experience Logitech quality

For more than a decade, Logitech has been making mice of uncompromising quality. With more than 200 million mice sold, Logitech is the world's leading mouse manufacturer.

Warranty

The Logitech® USB Wheel Mouse includes a two-year limited warranty (see details inside the box).
