## TV <br> Hybrid D'Sub series

Specifications

- Connectors according to: MIL C24308-NFC93425 - HE507

Amphenol D'Sub TW Hybrid Series permits
a mix of contacts including signal, power,
shielded and high voltage in the same housing with different contact arrangements.

This economic series was first developed from our military series, and has improved features:

- new contacts
- new high temperature black thermoplastic insert
- PCB configurations come reloaded with fixed contacts and brackets.
These connectors are supplied with screw machined contacts fixed in the insulator.
A complete range of housings are also available for cable application.

inner solder contact outer crimp contact

## Assembly method

- Slide the outer ring over the cable jacket. Trim the cable according to the recommended dimensions.
- Insert the cable dielectric and the center conductor inside the inner sleeve.
- Solder the central conductor to the shielded center contacts.
inner solder contact outer crimp contact

Right angle crimp shielded contacts:

soft solder

- Slide the outer ring towards the inner sleeve and recover the braid.
- Using crimp hand tool equipped with the appropriate dies, crimp in the area defined.

## Solder straight shielded contacts:

Solder right angle shielded contacts:

soft solder

## Assembly method

- Slide the outer ring over the cable jacket. Trim the cable according to the recommended dimensions.

Slide the outer ring towards the inner sleeve and recover the braid.

- Insert the cable dielectric and the center conductor inside the inner sleeve.
- Solder the central conductor to the shielded center - Solder by introducing metal through the outer ring hole. contacts.
