

Features

- Non-slip wooden platform board designed for heavy-duty use
- Ribbed frame structure to support weight evenly
- Slim storage profile
- Max Load 150kg
- EN14183:2003

RS PRO Heavy Duty Aluminium Folding Work Platform, 0.52 m Height, EN14183

RS Stock No.: 0827587

RS Professionally Approved Products bring to you professional quality parts across all product categories. Our product range has been tested by engineers and provides a comparable quality to the leading brands without paying a premium price.

This RS PRO heavy duty aluminium work platform is designed for professional use in industrial, manufacturing, and maintenance environments where a stable low- level working surface is required. Constructed from lightweight extruded aluminium, the platform offers excellent strength while remaining easy to handle.

The platform features a large, non- skid wooden deck, providing a comfortable and secure standing area. The wooden surface is painted and weather- protected, making it suitable for indoor and sheltered outdoor use. For safety and stability, the legs are secured with a pin system and lock firmly into position during use. When not in use, the platform folds easily for compact storage and transportation.

Manufactured to EN14183:2003, this work platform meets recognised European standards for professional step and platform equipment.

General Specifications

Material	Aluminium
Product type	Heavy Duty Work Platform
Treads	1
Platform Height (m)	0.52
Approx. Working Height (m)	2.27
Platform Length (m)	1.30
