

Parker Product Datasheet

High efficiency coalescing, dry particulate and oil vapour removal filter elements for Parker domnick hunter OIL-X EVOLUTION die-cast aluminium compressed air filters.

PART NUMBER: 010AA-ATEX
FILTER TYPE: AA General Purpose Coalescing and Dry Particulate - ATEX
MICRON RATING: Down to 0.01 micron
FOR USE WITH: OIL-X EVOLUTION 010 Housings

PRODUCT OVERVIEW

Since the introduction of the first OIL-X range, Parker domnick hunter has continued to develop both the compressed air filter and the standards governing compressed air quality. Constantly innovated, OIL-X EVOLUTION became the leading technology for compressed air filtration, providing the exact balance between air quality, energy efficiency and low lifetime costs.

The OIL-X EVOLUTION die-cast aluminium filter range included:

- General purpose and high efficiency coalescing and dust filter grades (AO & AA) for the removal of water and oil aerosols, solid particulates and micro-organisms
- Oil vapour removal grades (AC and ACS) for the removal of oil vapour

Sizing and Selection

Please refer to the product literature to verify filter codes, sizes and quantities required before ordering. Only using genuine Parker replacement elements will guarantee the filter's

performance.

For more information or a detailed discussion about your specific requirements please contact Parker or an authorised Parker distributor.
