

Features

- Hardened aluminium alloy base
- AL203 ceramics measuring surface
- Flatness of measuring surface $\leq 2\mu\text{m}$
- Stainless columns, tapping hole: M8 x 1.25mm.
- The unique fine adjustment structure make the measuring arm stable
- Parallel fine adjustment range 8mm.
- Clamp hole: $\varnothing 8\text{mm}$.

RS PRO Ceramic Comparator Stand,

RS Stock No.: 0716010

RS Professionally Approved Products bring to you professional quality parts across all product categories. Our product range has been tested by engineers and provides a comparable quality to the leading brands without paying a premium price.

Product Description

RS PRO Ceramic Comparator Stand

RS PRO comparator stands are precision tools used in metrology to hold and position a dial indicator, test indicator or measuring probe when checking the dimensional accuracy of a part. They are essential for comparing a workpiece's dimension to a standard or master part.

MAIN USES:

1. Used to measure small deviations in height, flatness or roundness of workpieces.
2. Ideal for Go/No-Go inspections.
3. Compare a part to a reference standard such as a master part or gauge block.
4. Checking flatness of parts.

APPLICATIONS:

Quality control in manufacturing.
Toolroom and inspection labs.
Calibration and gauge checking

General Specifications

Type	Ceramic Comparator Stand
Dimension	209mm x 146mm x 90mm (Base Wide 90mm)
For Use With	Dial/Digital Indicators

Approvals

Declarations	REACH DoC
