

FEATURES

- **Sintered Bronze Material:** Provides excellent wear resistance and durability, suitable for high-load applications
- **Self-Lubricating:** Reduces the need for additional lubrication, lowering maintenance costs
- **Compact Design:** With a 0.62 in outside diameter, it fits into tight spaces without compromising performance
- **Optimised Shaft Diameter:** Designed for a 0.49 in shaft, ensuring a precise fit and efficient operation
- **1-1/4 in Length:** Offers stability and support for various mechanical applications

RS PRO Sintered Bronze Plain Bearing, 1-1/4 in Length

RS Stock No: 528-169

RS Professionally Approved Products bring to you professional quality parts across all product categories. Our product range has been tested by engineers and provides a comparable quality to the leading brands without paying a premium price.

Product Description

The RS PRO sintered bronze plain bearing is designed for applications requiring reliable and efficient performance. This bearing is ideal for reducing friction between moving parts, ensuring smooth operation and longevity in machinery. Its primary benefit is its self-lubricating properties, which reduce maintenance needs.

General Specifications

Product Type	Plain Bearing
Shaft Diameter	0.49 in

Mechanical Specifications

Length	1-1/4 in
Material	Sintered Bronze
Outside Diameter	0.62 in
