

FEATURES

- **Sintered Bronze Material:** Provides high strength and wear resistance, ensuring long-lasting performance.
- **Compact Design:** With an outside diameter of 0.5 in, it fits easily into tight spaces, making it versatile for various applications.
- **Optimised Shaft Diameter:** Designed for a 0.37 in shaft, ensuring a precise fit and smooth operation.
- **Durable Construction:** Offers excellent load-bearing capabilities, reducing maintenance needs.
- **Corrosion Resistance:** The bronze material resists corrosion, extending the bearing's lifespan.

RS PRO 7/8 in Plain Bearing, Sintered Bronze

RS Stock No: 528-085

RS Professionally Approved Products bring to you professional quality parts across all product categories. Our product range has been tested by engineers and provides a comparable quality to the leading brands without paying a premium price.

Product Description

This RS PRO plain bearing is designed for applications requiring reliable and efficient rotational movement. Made from high-quality sintered bronze, it offers excellent durability and performance in various industrial settings. The bearing's compact size makes it ideal for use in confined spaces, providing smooth operation and reducing friction.

General Specifications

Product Type	Plain Bearing
Shaft Diameter	0.37 in

Mechanical Specifications

Length	7/8 in
Material	Sintered Bronze
Outside Diameter	0.5 in
