

FEATURES

- **Sintered Bronze Material:** Provides excellent wear resistance and durability, ensuring long service life.
- **0.31 in Shaft Diameter:** Compatible with standard shaft sizes, facilitating easy integration into existing systems.
- **5/16 in Length:** Compact design allows for use in space-constrained environments.
- **0.43 in Outside Diameter:** Ensures a snug fit, reducing vibration and noise during operation.
- **Self-lubricating:** Minimises maintenance requirements and enhances performance.

RS PRO Sintered Bronze Plain Bearing, 0.31 in Shaft Diameter

RS Stock No: 528-159

RS Professionally Approved Products bring to you professional quality parts across all product categories. Our product range has been tested by engineers and provides a comparable quality to the leading brands without paying a premium price.

Product Description

This RS PRO sintered bronze plain bearing is designed for applications requiring reliable and efficient rotational movement. Ideal for use in machinery where low friction and high wear resistance are essential, this bearing offers a cost-effective solution for various industrial needs.

General Specifications

Product Type	Plain Bearing
Shaft Diameter	0.31 in

Mechanical Specifications

Length	5/16 in
Material	Sintered Bronze
Outside Diameter	0.43 in
