

## SHOWA 772

Le SHOWA 772, très résistant, offre une meilleure protection contre les risques pour tout le bras. Un manchon doté d'une couche en nitrile imperméable et un revêtement supplémentaire de la paume en nitrile protègent contre l'huile, l'abrasion et les produits chimiques. Le bord élastique maintient le gant en place et ses propriétés antibactériennes et anti-odeurs sont parfaits en cas de port prolongé. L'adhérence et la flexibilité de la surface rugueuse s'allient pour assurer une dextérité et une précision optimales.
