Wera Rapidaptor Universal Bit Holder - 887/4 RR

Rapidaptor with ring magnet

The additional ring magnet holds long and heavy screws securely. A secure connection between screw and holder. No need to waste time looking for lost screws. Ideal for overhead work.

Features and Benefits

- Easily inserted and self locking bits
- Sleeve retracts as the screw is driven and releases when it seats
- Slide the locking sleeve forward and the bit pops up, where it is held
- Ring magnet holders also accept longer grooved-shank bits
- No extra tools required to remove bits
- Small sizes can be changed easily
- Free-spinning outer sleeve stabilises the electric screwdriver during fastening.
- Fits all 1/4" bits made according to DIN 3126
- One-hand use
