

Timer Cross reference list

Tele-controls

Function Letters	Tele-control function description	RS description
A	True off delay	true off delay
aW	Single shot timer (trailing edge)	On pulse (constant supply) type 2
Bi	Flasher (pulse start)	Symmetrical Recycler Pulse start
Bp	Flasher (pause start)	Symmetrical Recycler Pause start
E	On delay	On delay
E + R	On and off delay	On off delay (constant supply)
Es	On delay with control contact	On delay (constant supply) type 1
eW	Single shot timer	On pulse
eW + aW	Single shot timer	On off pulse
H	Contact protection relay	unique function
Ii	Cyclic timer (pulse start)	Asymmetrical Recycler pulse start
Ip	Cyclic timer (pause start)	Asymmetrical Recycler pause start
M	Multifunction timer (see specific functions)	
R	Off Delay	Off delay (constant supply) type 1
S	Star Delta start timer	Star/Delta type 1
Wa	Single shot trailing edge	On pulse (constant supply) type 2
Ws	Single shot leading edge	On pulse (constant supply) type 1
Wt	Pulse detection	On Pulse (control switch resettable)
Wu	Single shot leading edge	On pulse

Note: If letter is followed by the number 20 then it has 2 change over contacts. However if letter is followed by the number 11 the timer has 1 timed contact and 1 instantaneous contact.
