

Datasheet

ESP32

PLC Family

Industrial Shields

Technical Features ESP32 Internal Chip

MODEL TYPE	ESP32-WROOM-32UE
Input Voltage	12 to 24Vdc (Fuse protection (2.5A) Polarity protection)
Input rated voltage	24Vdc
Rated Power	30 W
I max.	15A
Size	101x119.5x70.1 101x119.5x94.7 101x119.5x119.3
SRAM	520 KB
Communications & Accessories	I2C, Ethernet, SPI, RS485 (Half Duplex), RS232, microSD, RTC, Bluetooth V4.2 BR/EDR and Bluetooth LE, Wi-Fi 802.11b/g/n

General Features

Power supply voltage	DC power supply	12 to 24Vdc
Operating voltage range	DC power supply	11.4 to 25.4Vdc
Power consumption	DC power supply	30 W MAX.
External power supply	Power supply voltage	24Vdc
	Power supply voltage	700 mA
Insulation resistance	20mΩ min.at 500Vdc between the AC terminals and the protective earth terminal.	
Dielectric strength	2300 VAC at 50/60 Hz for one minute with a leakage current of 10mA max. Between all the external AC terminals and the protective ground terminal.	
Shock resistance	80m/s ² in the X, Y and Z direction 2 times each.	
Ambient temperature (operating)	0° to 60°C	
Ambient humidity (operating)	10% to 90% (no condensation)	
Ambient environment (operating)	With no corrosive gas	
Ambient temperature (storage)	-20° to 60°C	
Power supply holding time	2ms min.	
Weight	380g/490g/600g	

GPIO(x1)

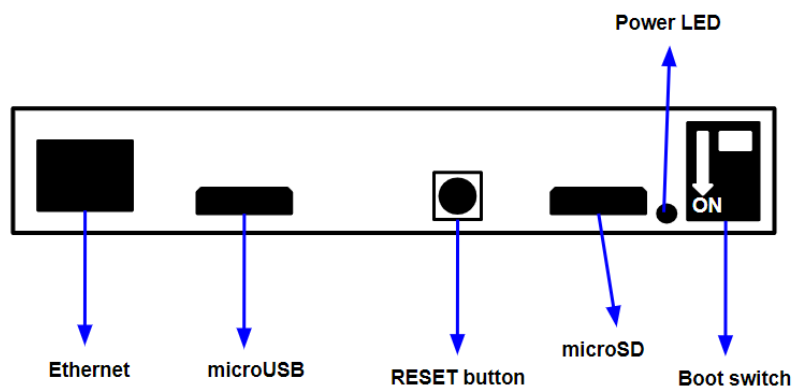

Digital GPIO33 (3.3V)

Expandability

I2C - 127 elements
ModbusRTU with RS485: 32 elements

Upper Side

I/Os Table

		I/Os Table				
Model	Reference	Analog Input	Digital Isolated Input	Digital Isolated Output	Digital/Analogic Output	Relay Output
21+	01200X000200	6	7	5	3	0
42+	01200X000400	12	14	10	6	0

Performance Specifications

Raspberry Board	ESP32-WROOM-32UE
I/O control method	Combination of the cyclic scan and immediate refresh processing methods.
Programming language	Arduino IDE
Website	https://www.espressif.com/

Program Uploading Process

With these family devices, we must follow a certain protocol to successfully upload a program:

- Connect the microUSB cable to the microUSB port:

- Configure this switch (BOOT) in ON position:

- Upload the code.
- Once the code is uploaded, turn OFF the previous switch:

- Pulse the RESET button:

Warnings

Unused pins should not be connected. Ignoring the directive may damage the controller.

Before using this product, it is the responsibility of the user to read the product's User Guide and all accompanying documentation.

Industrial Shields PLCs must be powered between 12Vdc and 24Vdc. If a higher voltage is supplied to the equipment can suffer irreversible damage.

Maintenance must be performed by qualified personnel familiarized with the construction, operation, and hazards involved with the control.

Maintenance should be performed with the control out of operation and disconnected from all sources of power.

The Industrial Shields Family PLCs are Open Type Controllers. It is required that you install the Raspberry PLC in a housing, cabinet, or electric control room. Entry to the housing, cabinet, or electric control room should be limited to authorized personnel.

Inside the housing, cabinet or electric control room, the Industrial Shields PLC must be at a minimum distance from the rest of the components of a minimum of 25 cm, it can be severely damaged.

Failure to follow these installation requirements could result in severe personal injury and/or property damage. Always follow these requirements when installing Raspberry family PLCs.

In case of installation or maintenance of the PLC please follow the instructions marked in the Installation and Maintenance section on the User Guide.

Do not disconnect equipment when a flammable or combustible atmosphere is present.

Disconnection of equipment when a flammable or combustible atmosphere is present may cause a fire or explosion which could result in death, serious injury and/or property damage.

Inside the encapsulated, there are supercapacitors if 25F which can be dangerous. Be careful with them.

RTC

This PLC has integrated the DS3231 Real Time Clock model which is powered by a button battery (CR1216 or CR1220).

Symbology

	Indicates that the equipment is suitable for direct current only; to identify relevant terminals
	Indicates that the equipment is suitable for alternating current only; to identify relevant terminals
	To identify the control by which a pulse is started.
	To identify an earth (ground) terminal in cases where neither the symbol 5018 nor 5019 is explicitly required.
	To identify the switch by means of which the signal lamp(s) is (are) switched on or off.
	CE marking indicates that a product complies with applicable European Union regulations
	Indicates a potentially hazardous situation which, if not avoided, could result in death or serious injury
	To indicate hazards arising from dangerous voltages
