Series 7400 Krafftform Torque Screwdrivers - Pre-set, adjustable torque models

Pre-set, adjustable torque screwdrivers

Pre-set torque, adjustable within a defined range. Also available in ESD version (also for HIOS/Halfmoon bits) and with Krafftform Micro handle.

Unlimited torque

Unlimited torque for loosening seized screws.

Versatile

Rapidaptor technology makes the tool adaptable since bits and sockets can be exchanged rapidly.

Chuck-all

The Rapidaptor quick-release chucks hold 1/4" DIN ISO 1173-C 6,3 and E 6,3 as well as Wera series 1 and 4 bits.

Rapid-in and self-lock

The bit can be pushed into the adaptor without moving the sleeve. The lock is activated automatically as soon as the bit is applied to the screw. Bits are held securely and wobble-free.

Rapid-out

Simply push the sleeve forward to change the bit. The spring mechanism lifts the bit off the magnet and unlocks the tool. The bit can be easily removed. The rapid-out function makes it easy to remove even the smallest bits without extra tools.

Individual pre-setting

The pre-set torque screwdrivers of the Krafftform 7400 series with a pre-set torque value can be set to any value within the specified metered range in the test laboratory.
