

Oil Condition Monitoring – Report Example

1

Trended analysis

Standard tests for Metal and Chemical Contamination, Oil viscosity and Water content.

2

Alarm radar and commentary

Graphic representation allows visual review of status and commentary from lab will advise best course of action.

3

Condition based oil changes

Having laboratory confirmation of Oil Condition allows you to change your oil 'on Condition', as opposed to changing on a 'time based' basis, therefore getting value for money from your oil as you change it when only really necessary.
