RS Pro DEC/DIMRF-768 Receiver radio Frequency For single color strip LED 12 & 24V

Specifications :

Radio frequency dimmer-receiver for white strip led lumihome®. Allows full control of a cold white or warm white led installation by combining a well-tested wireless technology and a range of very elegant accessories. It is the ideal way to drive the lighting of a lounge, an office or a meeting room.

Being compatible with a 12V or a 24V installation, this dimmer-receiver can control up to 4 led strips. Its implementation is easy just like the pairing with the 4 control accessories: RF remote controller simple or multi zone, wall mounted or table dimmer. Its small size allows discrete integration.
