

Endress+Hauser CM448-AAA6A51AABAA

Liquiline CM448 is the smart choice for all of your applications: it provides you with best-in-class performance, highest flexibility and clever simplicity to save you time and money.

Picture for reference only. Product appearance may vary based on configuration

The Liquiline CM448 8-channel transmitter allows you to connect up to 8 Memosens sensors from over 12 measurement parameters. It offers automatic sensor recognition, simple operation, and standardized spare parts with all other devices of the Liquiline platform. With its inputs, outputs, controllers, and math modules, you can even control cleaning systems or dosing pumps.

Configuration of CM448-AAA6A51AABAA:

Approval:	AA	Non-hazardous area
Digital Communication:	A	Modbus TCP, Webserver+optional outputs
Digital Sensor; Output; Input:	6A5	6x; 2x 0/4..20mA, 4x relay, 2x digital; 2x digital, 2x 0/4..20mA
Power Supply:	1	100...230VAC (50/60Hz)
Cable Entry Housing, Sensor:	AA	Metric, Metric
Female Jack Fieldbus Communication:	BA	W/o
Cable Entry Set+female Jack:	A	Enclosed

Alternative part number: CM448-4RA9/0
