Product Description

RS PRO Standard Steel Lockers

A range of steel lockers are available in various sizes, but all share the same footprint; making them ideal for fitting into runs under windows (or obstructions), in order to maximise space.

Standard Steel lockers All standard steel lockers are the ideal choice for schools and colleges as well as general workplace personal storage. Versatile, hard-wearing and reliable, our lockers provide quality, choice and security as standard.

Lockers have been tested and conform to the requirements of the British Standard for Clothes Lockers BS 4680: 1996 'Standard Duty'.

ActiveCoat antimicrobial technology is incorporated into all our locker products at the time of manufacture, offering constant protection against a wide range of bacteria.

Important note regarding locker installations

Wherever possible lockers should be secured to ensure stability. Single lockers should ideally be fixed back to a wall. Runs of lockers should be fixed together side-to-side and either fixed back to a wall or fixed back-to-back to another run of lockers.

Accessories

Customise our lockers to meet your requirements..

Sloping tops are essential in hygiene sensitive locations (such as hospitals and the food industry). The slope prevents items and litter being left on locker tops and makes cleaning easier. Sloping tops increase the overall height of the locker.

Locker support frames raise lockers off the floor, reducing impact damage and improving hygiene standards.

Supplied with adjustable feet to allow for uneven floors. Inset rear legs to clear pipes and skirting. Standard height is 150mm.

Support frame with seat. Seat units are incorporated into the locker frame, as well as slatted seats to the front.

They can include a mesh shelf for footwear.
