RS Pro LED Strip, 60 Blue, Green, Red, White LEDs, 2.5m

RS Pro: 136-3586

Specifications:

New strip led Lumihome® integrating the RGBW technology able to deliver a multicolour RGB lighting and a true very high quality warm white lighting. By combining a controller and a compatible remote control you can create attractive lighting atmospheres. The use of led SMD5050 Epistar in high density (60 led/m) delivers a lighting of unequalled quality because of the absence of resin that allows a light flux of high brightness.

Available in two lengths, this strip led should be used as a source of secondary lighting for large surfaces (company hall, restaurant ceiling, etc.) or in a living room (salon, dining room, bedroom, etc.)

The “Easy Plug” connector system allows a simplified installation without specific equipment.

Features:

- Electric consumption / m: 19W
- Power / m: 620 lumens
- Protection: none (IP20)
- Lighting: RGBW
- Dimension (L x l x h): 250/500 x 10 x 3mm
- Density of led / m: 60
