1-channel thermal device circuit breaker for protecting loads up to 32 V DC in the event of an overload. Fuse type: slow-blow. Can be plugged onto fuse terminal blocks and interfaces for flat plug-in fuse of type C according to standard ISO 8820-3. With fixed nominal current: 6 A

Your advantages

- Fast, replacement part-free recommissioning after an event with the reconnection options
- Easy to retrofit in existing systems with vehicle flat-type fuses with identical pin connector pattern
- Easy identification of the nominal current value via color marking

Commercial data

|                                      |               |
|--------------------------------------|---------------|
| Item number                          | 1499965       |
| Packing unit                         | 100 pc        |
| Minimum order quantity               | 1 pc          |

## Technical data

### Product properties

|                     |                                 |
|---------------------|---------------------------------|
| Product type        | Thermal device circuit breakers |
| Type                | Male                            |
| Number of positions | 1                               |
| No. of channels     | 1                               |

### Insulation characteristics

|                  |     |
|------------------|-----|
| Protection class | III |
|------------------|-----|

### Electrical properties

|      |         |
|------|---------|
| Fuse | thermal |
|------|---------|

### General

|                                  |                                                                                        |
|----------------------------------|----------------------------------------------------------------------------------------|
| Rated voltage                    | max. 32 V DC                                                                           |
| Rated current $I_N$              | 6 A                                                                                    |
| Required backup fuse             | Only required if $I_{max}$ of the power supply > the short-circuit switching capacity. |
| Short-circuit switching capacity | 150 A ( $\geq 3$ shutdowns)                                                            |
|                                  | 2000 A ( $\geq 1$ switch-off)                                                          |
| Fuse                             | thermal                                                                                |
| Voltage drop                     | < 150 mV                                                                               |
| Contact switching type           | Type C in accordance with ISO 8820-3                                                   |

### Connection data

|                   |           |
|-------------------|-----------|
| Connection method | pluggable |
|-------------------|-----------|

### Dimensions

|                     |         |
|---------------------|---------|
| Dimensional drawing |         |
| Width               | 6.2 mm  |
| Height              | 19.7 mm |
| Depth               | 29.5 mm |

### Material specifications

|          |                       |
|----------|-----------------------|
| Color    | moss green (RAL 6005) |
| Material | Copper, tin-plated    |

### Mechanical properties
