drying
- Improves adhesion
to the print bed
- Helps to give a
smooth finish to
your finished
products
- Colourless

RS PRO 1 L Bottle Acetone for Electrical Equipment

RS Stock No.: 918-1082

RS Professionally Approved Products bring to you professional quality parts across all product categories. Our product range has been tested by engineers and provides a comparable quality to the leading brands without paying a premium price.

Product Description

Acetone from RS PRO. This 1 litre bottle of acetone is designed to be used with a variety of electrical equipment and especially 3D printing equipment. This is a perfect cleaning product for your electrical equipment as the acetone is a fast drying solvent which does not leave any residue. The vapours can also smooth the surface leaving you with the best finish possible. This RS PRO acetone can be used to improve the adherence of the ABS plastic to the printing bed in the 3D printing process. It is recommended to pour this solution into a spray bottle to speed up the fast drying time the acetone already has. The Acetone is a flammable solvent and should not be used near live electrical equipment or near ignition sources.

General Specifications

Package Size	1L
Package Type	Bottle
Product Category	Solvent
Appearance	Colourless
Odour	Distinctive
Applications	cleaning and removing grease, oil, dust or flux from delicate electronic assemblies

Mechanical Specifications

Viscosity At 20°C	0.33mPas
Evaporation Rate	7.7
Flammability	Flammable
