- Dual UV-resistant polycarbonate inspection windows
- Twin toggle latches with split pins for secure closure
- Supplied complete with labels

RS PRO is the own brand of RS. The RS PRO Seal of Approval is your assurance of professional quality, a guarantee that every part is rigorously tested, inspected, and audited against demanding standards. Making RS PRO the Smart Choice for our customers.

Product Description

RS PRO fire extinguisher box, engineered to provide secure storage and rapid access when every second counts. Designed with a front-loading door, this durable enclosure safely houses a single 6kg fire extinguisher, making it ideal for both vehicle and building installations.

Manufactured from tough, UV-stabilised roto-moulded polyethylene, the box is built to withstand demanding environments while protecting the extinguisher from water, dust, and UV exposure. Dual UV-resistant polycarbonate inspection windows allow quick visual checks without opening the box, ensuring your extinguisher is always ready for use.

Secure twin toggle latches with split pins keep the door firmly closed during transit, while an internal ladderlock buckle and webbing strap hold the extinguisher securely in place. The box is also UTAC tested and approved for side-guard use (E2 73 R - 0117228), making it a trusted solution for commercial vehicles.

This robust fire extinguisher box combines durability, security, and accessibility, making it the ideal storage solution for commercial vehicles, fleet operators, construction equipment, and industrial facilities.
