

FEATURES

- **Sintered Bronze Material:** Offers superior wear resistance and self-lubrication, reducing the need for frequent maintenance.
- **50.06 mm Outer Diameter:** Ensures compatibility with a wide range of shafts and housings.
- **35 mm Length:** Provides stability and support for various applications.
- **39.97 mm Shaft Diameter:** Designed for precise fitting, enhancing performance and efficiency.
- **High Load Capacity:** Suitable for demanding industrial environments, ensuring longevity and reliability.
- **Corrosion Resistance:** Ideal for use in harsh environments, extending the lifespan of the bearing.

**RS PRO Sintered Bronze Plain Bearing,
50.06 mm Outer Diameter**

RS Stock No: 558-447

RS Professionally Approved Products bring to you professional quality parts across all product categories. Our product range has been tested by engineers and provides a comparable quality to the leading brands without paying a premium price.

Product Description

This RS PRO sintered bronze plain bearing is designed for high-performance applications where durability and reliability are crucial. Ideal for use in machinery and equipment, it provides excellent wear resistance and self-lubricating properties, ensuring smooth operation and reduced maintenance.

General Specifications

Product Type	Plain Bearing
Shaft Diameter	39.97 mm

Mechanical Specifications

Length	35 mm
Material	Sintered Bronze
Outside Diameter	50.06 mm
