

## XP20 SETTING TOOL *for Plasterboard Fixings*

Designed for frequent use and more demanding plasterboard and hollow wall fixing jobs, the XP20 is a setting tool based in our long experience in designing stapling guns and riveting pliers. Designed on an almost identical platform as our riveting pliers, with the same requirements in terms of quality and performance, the XP20 is a perfect tool for plasterboard fixing.

The long arm on the XP20 makes it ideal for fast, effective fixing of hollow wall anchors. Other features include rubber handles for optimal grip and comfort and a metal locker for convenient storage.

The XP20 works with all sizes of Rapid Hollow wall anchors: Ø8, Ø11 and Ø13.

Choose XP20 and enjoy a handy, complete, no-hassle fixing solution.

Delivered in sturdy FSC hangable Corrugated carton box.
