

## FHT-MCL-34-F

Ruland FHT-MCL-34-F, 34mm Face Mount Shaft Collar with Tapped Hole,  
Black Oxide Steel, One-Piece Clamp Style, 57mm OD, 15mm Width

### Description

Ruland FHT-MCL-34-F is a one-piece shaft collar with a 34mm bore, 57mm OD, and 15mm width. FHT-MCL-34-F has tapped holes for mounting shaft collars to sprockets, pulleys, metallic plates, or other components. Tapped holes allow for a secure connection between the shaft collar and mated component. The clamp style design does not mar the shaft, is easy to remove, and is indefinitely adjustable. Equipment manufacturers benefit from the tightly controlled face to bore perpendicularity (TIR of ? .05mm). Perpendicularity is critical for alignment when the shaft collar is used as a load bearing face, mechanical stop, or for mounting components such as gears or bearings. Proprietary processes have been developed by Ruland to maintain superior fit, finish, and holding power. FHT-MCL-34-F is stamped with the Ruland name and bore size for ease of identification. Forged screws test beyond DIN 912 12.9 standards to ensure maximum holding power. FHT-MCL-34-F is machined from solid bar stock to a fine burr free finish and sourced exclusively from North American mills. Ruland uses 1215 lead-free steel with a proprietary black oxide finish that produces a fine glossy finish while increasing holding power and resisting corrosion. It is RoHS3 and REACH compliant and manufactured in our Marlborough, MA factory under strict controls using proprietary processes.
