

Xenon Flashing Light (red)

Art.-Nr. SG1670

-
- Including adapter and surface mounting
 - High flash power
 - Can also be mounted on SG1660
 - Splashproof
 - Protection class: IP54
-

You can install the Xenon flashing light inside and outside your building. The optical signalling device is a crucial link in a fully functioning alarm chain. At the start of the chain is a detector. In the event of an alarm, the colored Xenon flashing light can be seen over a large distance and flashes at 70 times a minute. The robust plastic housing (IP 54) of the signalling device offers protection against the environmental influences. The flashing light is supplied externally with 12V operating voltage. You can choose between three different light colors, according to your requirements: red (SG1670), yellow (SG1675) and blue (SG1680).

Xenon Flashing Light (red)

Art.-Nr. SG1670

Technical Data

DC voltage supply	12V
Flashing frequency	1.17Hz
Height	110mm
Housing material	ABS
IP protection class	54
Illuminant	Xenon
Installation location	Indoors and protected outdoor areas
Length	75mm

Luminous color	Red
Max. operating temperature	55°C
Min. operating temperature	-25°C
Net weight	0.15kg
Power consumption	350mA
Power consumption	4,2
Width	175mm
