Monitoring relay - current monitoring 1-phase

Status: Available Data sheet created: 01.07.2025

Item Number: 1341200 - **Serie:** Enya - **EAN:** 9008662005945

~	Monitoring relays ENYA series
~	DC and AC monitoring in 1-phase networks
~	Multifunction
~	Supply voltage 230V AC
~	2 changeover contacts
~	width 35mm
~	Installation type

Description

a.c/d.c. current monitoring in 1-phase mains with adjustable thresholds (Min and Max), timing for start-up suppression and tripping delay separately adjustable.

Short description	Current monitoring 1-phase, 10A, multifunction, 2 changeover contacts
Item Number	1341200
EAN	9008662005945
Main category	Monitoring Relays
Series	Enya
Туре	E3IM10AL20 230V AC
Design	Installation design
Supply	230V AC
Dimensions	35 x 87 x 65 mm

Functions and measurands

Amount of functions

3

Shutter delay (Delay)

Overcurrent monitoring (OVER, OVER+Latch)

When the supply voltage U is applied, the output relay R switches into on-position, if the measured current is below the Max-value. When the measured current exceeds the Max-value, the output relay R switches into off-position after the interval of the tripping delay (Delay) has expired. OVER: The output relay R switches into on-position again, if the current falls below the Min-value. OVER+Latch: The output relay R switches only into on-position again by interrupting and re-applying of the supply voltage, provided that the measured current is below the Max-value.

Window function (WIN, WIN+Latch)

When the supply voltage U is applied, the output relay R switches into on-position, if the measured current is within the adjusted window. When the measured current leaves the window between Min and Max, the output relay R switches into off-position after the interval of the tripping delay (Delay) has expired. WIN: The output relay R switches into on-position again, if the current re-enter the adjusted window. WIN+Latch: The output relay R switches only into on-position again by interrupting and re-applying of the supply voltage, provided that the measured current is within the threshold values.

Untercurrent monitoring (UNDER, UNDER+Latch)

When the supply voltage U is applied, the output relay R switches into on-position, if the measured current is beyond the Min-value. When the measured current falls below the Min-value, the output relay R switches into off-position after the interval of the tripping delay (Delay) has expired. UNDER: The output relay R switches into on-position again, if the current exceeds the Max-value. UNDER+Latch: The output relay R switches only into on-position again by interrupting and re-applying of the supply voltage, provided that the measured current is beyond the Min-value.

Mechanical design	
Housing material	made of self-extinguishing plastic
Housing - protection degree	IP40
Mounting	top hat rail TH 35 7,5-15 according to IEC 60715:2017 / EN 60715:2017
Terminals/connections	Touch-proof clamping yoke terminals according to DGUV 3 (Screwdriver PZ1 required)
Terminals - protection degree	IP20
Mounting position	any
Max. Tightening Torque	1 Nm
Terminal capacity	 1 x 0.5 to 2.5mm² with/without ferrule 1 x 4mm² without wire end ferrule 2 x 0.5 to 1.5mm² with/without end sleeves 2 x 2.5mm² flexible without ferrules
