GE 20 ESX-2LS

SKF Explorer radial spherical plain bearing, virtually maintenance-free, sealed, metric sizes

Radial spherical plain bearings are designed to accommodate radial and combined radial and axial loads, and also misalignment. This specific design includes an SKF Explorer steel/steel sliding contact surface combination. They are initially lubricated and have a triple-lip, heavy-duty contact seal on both sides. Compared to conventional steel/steel bearings, they have increased dynamic load ratings.

- Designed for radial and combined radial and axial loads
- Long service life
- Virtually maintenance-free
- Suitable for heavy static or impact loads
