Table Notes:

Values apply with max bores.
Maximum recommended tightening torque.

Materials & Finishes

Hubs:

Aluminium alloy

Bellows:

Electrodeposited nickel

Temperature Range

-50°C to +120°C

Table Notes:

Peak torque. Select a size where Peak Torque exceeds the application torque x service factor.
Max. compensation values are mutually exclusive.
Torsional stiffness values apply at 50% peak torque with no misalignment, measured shaft-to-shaft with largest standard bores. Note that in some vendors' catalogues the given torsional stiffness applies to the un-mounted bellows element only, an unrepresentative calculated value.
