

Rapid

Rapid 18V Work light BWL2400

The BWL2400 is a reliable and versatile cordless LED work light that gives you bright and powerful lighting wherever you need it. With a brightness of 2400 lumens and two light settings, it's perfect for tasks that need intense work light, as well as softer, general illumination. This cordless work light runs on an 18V battery, so you can work anywhere – in the garage, shed, attic, or other places without power outlets. The lamp head tilts up to 180°, making it easy to point the light exactly where you need it. The work light is easy to set up or hang using the built-in hook or handle. It's lightweight, compact, and simple to move around, with a handle on the back for extra convenience. When you're done, it takes up minimal space in storage and can also be mounted on a tripod (sold separately). The Rapid BWL2400 is part of Bosch's battery partnership, POWER FOR ALL ALLIANCE. So you can use the same battery with Rapid's 18V products as with a number of products from brands like Bosch, Gardena, Husqvarna and Wagner. We recommend the P4A 2.5 Ah battery, which gives up to 3 hours of operating time. Battery and charger not included, but sold separately.

Attributes
