Table 3: 8B0M0200HF00.000-1 - Technical data

- 1) Valid under the following conditions: 40°C ambient temperature, installation elevation <500 m above sea level.
- 2) Corresponds to the proportionate power consumption of the 8B0M0040HFF0.000-1 fan module.
- 3) Continuous operation of ACOPOS^{multi} mounting plates at an installation elevation of 500 m to 4000 m above sea level is possible when taking the specified reduction in continuous power into account. Requirements that go beyond this must be arranged with B&R.
- 4) Continuous operation of ACOPOS^{multi} mounting plates at ambient temperatures from 40°C to max. 55°C is possible when taking the specified continuous power reductions into account.
- 5) The dimensions define the size of the mounting plate. Additional spacing above and below the backplanes must be taken into account for mounting, connections and air circulation.

4 Dimension diagram and installation dimensions

Information:

nnnn indicates the number of slots (0160 equals 16 slots).

- 1) n... Number of width units on the mounting plate
- 2) 6 + 2x n mounting holes $\varnothing$ 6 mm
The heads of the fastening screws are not permitted to exceed a height of 6 mm.
- 3) All drill holes 6 mm
- 4) Sealing surface
- 5) Fin depth of the feed-through heat sink without mounted fan 8B0M0040HFF0.000-1

Note:

When securing mounting plate 8B0MnnnnHF00.000-1, make sure that the screws are mounted on the backplane side such that they comply with IP65 protection requirements per EN 60529.

Information:

The fastening elements of the feed-through heat sink are not permitted to extend beyond the installation surface! This would prevent the ACOPOSmulti modules from being mounted to the feed-through cooler.
