Order No.: 103679

(old Order No.: 101040 & 100319)

Equipment & Application

- **Turbo sweeping system = Sweeping twice in one step:** The disc brush system is extended with a fine-dirty brush behind it. This allows these machines to effectively sweep twice in one step. Even the most fine debris is collected.
- Lightweight machine as perfect basic equipment for sweeping
- **Brush height adjustment:** disc brush pressure adjustable for optimal sweeping on various grounds such as asphalt, concrete, slaps or for damp leaves, sand, uneven surfaces.
- The disc brushes, which protrude on both sides, ensure even greater sweeping performance
- Sweepings container with latching function of the handle to prevent unintentional opening
- Space-saving storage in upright position
- High-quality and long-lasting disc brushes:
4 years warranty on brush wear

Technical data

Working principle	Turbo sweeping system 2 disc brushes & 1 fine dirt roller brush
Brush drive	Manual
Sweeping width	75 cm
Dirt container capacity (max.)	40 liters
Sweeping performance	2.700 m ² /h
Weight	11,5 kg

Application areas

For occasionally sweeping operations for medium-sized areas up to 500 m² like petrol stations, workshops, parking spaces and yards.
