

Acid-resistant resist pen RP-200

【Product Description】

This is an alcohol-based special resist pen that is resistant to water and acids.

【Product features】

- As it has excellent acid resistance, it can be etched by drawing a pattern directly on the cut substrate.
- Because it has excellent light-shielding properties, you can quickly create and modify familiar circuits for artwork films.
- Suitable for pattern correction after development processing and inkjet film correction after pattern printing.
