

PT-104 Data Logger

Temperature, Resistance, Voltage

The ultimate in resolution and accuracy

0.001 °C

0.01 °C

- Measures and records up to 4 platinum resistance thermometers
- Works with PT100 and PT1000 sensors
- Supports 2, 3 and 4-wire sensors
- Measures voltage and resistance
- 24-bit ADC
- Uses calibrated reference resistors for stability
- Supplied with PicoLog data logging software
- USB interface ensures easy installation
- Ethernet interface for remote operation
- Powered by USB port or Power-over-Ethernet (PoE)
- Multiple units can be run on a single PC
