RS Professionally Approved Products bring to you professional quality parts across all product categories. Our product range has been tested by engineers and provides a comparable quality to the leading brands without paying a premium price.

Product Description

The ESD full-width shelf is made of 25 mm dissipative board, identical to the material used for the worktop, ensuring high durability and full protection against electrostatic discharges. Mounted fixed in a horizontal position, it provides a solid surface for storing tools, components, and materials needed during work. Thanks to its consistent appearance with the rest of the workstation and the option to be made in various dimensions upon request, the shelf perfectly meets the requirements of modern workspaces with elevated ESD standards.

Accessories compatible with L & H Type workbenches
