

This Stanley 19 inch tote comes complete with removable top organiser. The tote is ideal for storing and carrying larger tools, whereas the organiser is perfect for small parts and accessories, such as screws and fixings.

The tote has a long metal carry handle, which locks in place for carrying and tilts down for storage.

The organiser also has a integrated carry handle, allowing it to be used as a separate unit. Heavy-duty, rustproof metal latches provide extra strength and durability, and a front push-button enables simple detachment of the organiser from the tote. To allow for different sized tools and accessories, the organiser is supplied with removable dividers to alter the size of the compartments.

Dimensions:

Height: 25cm.

Width: 56cm.
