APPLICATIONS**SAFETY & EMC****DESCRIPTION**

The ROF-78K is a switching regulator with a wide input voltage range, high efficiency and a low profile, pin-less SMD package. Seven output voltages are available as standard: 3.3V, 5V, 6.5V, 9V, 12V, 15V or 24VDC with 500mA continuous output current rating over the full operating temperature range of -40°C to +95°C without derating. No minimum load is required. These modules can be SMD reflow soldered. The connection pads have corner half-vias to enable optical inspection of the joints after soldering.
