

FEATURES

- **Sintered Bronze Material:** Offers excellent wear resistance and durability, ensuring long service life.
- **Outer Diameter of 60.09 mm:** Provides compatibility with a wide range of housings and applications.
- **Shaft Diameter of 49.97 mm:** Ensures a precise fit for optimal performance and reduced vibration.
- **Length of 63 mm:** Supports stable and efficient operation in various mechanical assemblies.
- **Plain Bearing Design:** Simplifies installation and maintenance, reducing downtime.

RS PRO Sintered Bronze Plain Bearing, 60.09 mm Outer Diameter

RS Stock No: 594-786

RS Professionally Approved Products bring to you professional quality parts across all product categories. Our product range has been tested by engineers and provides a comparable quality to the leading brands without paying a premium price.

Product Description

This RS PRO sintered bronze plain bearing is designed to facilitate smooth rotational or linear movement between two surfaces. Ideal for applications requiring low friction and high wear resistance, this bearing is a reliable choice for various industrial settings.

General Specifications

Product Type	Plain Bearing
Shaft Diameter	49.97 mm

Mechanical Specifications

Length	63 mm
Material	Sintered Bronze
Outside Diameter	60.09 mm
