Product Description

RS PRO Transparent Polypropylene 9 Compartment Box, 60mm x 240mm x 170mm

Use this transparent compartment box from RS PRO to store small around your home or workshop, from nails and screws to pins and scissors. The fold-down handle makes it equally useful for transporting items. As it has no compartments, it's also suitable for storing larger tools.

This box has heavy-duty polyvinyl chloride (PVC) corners to protect it from knocks and bumps. The reinforced composite locking catches prevent the box from falling open and keep your items safe from dust and dirt. Both the container and the lid are transparent, so you can easily see what's inside and identify your items without having to open the box.

This container is made from tough polypropylene (PP) plastic, so it's designed for heavy use and wear. It's well-suited to a range of storage tasks in domestic, commercial and industrial settings.
