RS Pro Slim LED Spotlight 30W White finish

RS Stock No: 1363563
Cool Daylight

RS Stock No: 1363564
Warm White Light

Specifications :

This spotlight is a new market benchmark because of its extra-slim design and its high lighting capabilities. It is built in an aluminium frame barely 39.5mm thick and our teams have succeeded in delivering a system with an impressive lighting power: up to 2700 lumens. A feat achieved by the use of SMD5730 new generation LEDs.

This new reference offers an outstanding light efficiency while restricting heat development. Moreover the back of the frame has been designed for perfect venting of the electronics.

Right from switching it on, you will notice that no compromise has been accepted in terms of lighting quality. Its glass is antiglare for enhanced comfort. Available in Cool Daylight version (6000K) or Warm White version (3500K) it can be completed with a 40cm white offset arm, as an option (1363567)

Features :

- Power supply consumption: 30W
- Lighting power:
Cool Daylight. : 2700 lumens
Warm w. : 2400 lumens
- Lighting colour: Cool Daylight 6000K
- Lighting colour: Warm White 3500K
- Dimension (h x l x p):
223 x 238 x 39.5 mm
