COMPOSITION AND PROPERTIES

CPQ dinfex® alh/a is a liquid disinfectant based on a composition of hydroalcoholic substances and non-foaming surfactants that give it extraordinary biocidal power over all types of microorganisms (viruses, molds, bacteria, etc.).

It complies with the UNE-EN 13697 standard, in clean conditions. Chemical antiseptics and disinfectants. Quantitative non-porous surface test for the evaluation of the bactericidal activity of chemical disinfectants used in food products, in industry, at home and in the community.

It complies with the UNE-EN 14476 standard: chemical antiseptics and disinfectants: quantitative viricidal suspension test of chemical antiseptics and disinfectants used in medicine: test method and requirements (phase 2, stage 1).

Specifically suitable for combating all types of coronaviruses since, thanks to its alcohol content of over 60%, it complies both with the WHO recommendations for this application and with the instructions of the Ministry of Health in its guidelines for health professionals.

It is colorless. It evaporates quickly, without leaving residues on the surfaces.

TECHNICAL CHARACTERISTICS

Appearance	Líquido incoloro transparente.
pH	5,5 aprox.
Density 20° C	0,89 g/cm ³ aprox.

FIELDS OF APPLICATION

CPQ dinfex® alh/a is indicated for use on all kinds of surfaces, materials and utensils.

It is authorized for: use by the general public, environmental use and use in the food industry.
