## Temperature measuring device with factory scale label

Digital temperature measuring device DTM 110 with digital display, test report, and factory calibration certificate. The DTM 100C features a patented sensor head (K-type) with a chromel-alumel probe and is suitable for precise measurements even on very fine soldering tips. The scope of delivery includes the temperature measuring device (0DTM113C), the sensor head (0DTM101) with sensor wire (0DTM102), the calibration adapter (0DTM105), and the factory calibration certificate.
