

MODULAR is the first totally modular case! Manufactured, in anthracite grey high impact Polypropylene plastic, using the injection moulding technique. The extreme flexibility of the MODULAR case is due to the engineering of internal and external elements that are interchangeable. The bottom dividers are designed to remain steady even in case of lateral collisions and accidental overturning of the case.

This system gives the flexibility of an adjustable interior as well as the steadiness of fixed compartments. The various available combinations enable to realize almost every desired configuration.

- two chromed locks with key
- soft rubber grip handle
- hinges with 90° opening block system
- "click and go" system to easily fix the tool pallets
- modular TROLLEY (optional), for an easier transportation of the case

Modular 180 PEL

Model Description:

- 2 tool pallets with elastics
- 2 latches with key lock
- Bottom tray with high stability divider modules
- Document wallet
- Fitted with a third optional pallet

Characteristics

CLICK & GO

The revolutionary Patented "click and go" fixing system permits to insert or substitute the tool pallets inside the case in an easy and quick way. The maximum modularity and flexibility in the use of the classic tool pallet is so granted

The exclusive rotating feet system grants a practical and quick fixing of the various accessories. Thanks to this patented system it is possible to create the different illustrated configurations.
