

FEATURES

- **Sintered Bronze Material:** Offers high strength and excellent wear resistance, ensuring long-lasting performance.
- **Compact Design:** With an outside diameter of 0.31 in, it fits into tight spaces, making it versatile for various applications.
- **Optimised Shaft Diameter:** Supports a shaft diameter of 0.18 in, providing a precise fit for efficient operation.
- **Low Friction:** Reduces energy loss and heat generation, enhancing efficiency and lifespan.

RS PRO 1/4 in Plain Bearing, Sintered Bronze

RS Stock No: 528-134

RS Professionally Approved Products bring to you professional quality parts across all product categories. Our product range has been tested by engineers and provides a comparable quality to the leading brands without paying a premium price.

Product Description

This RS PRO plain bearing is designed for applications requiring low friction and high wear resistance. Made from sintered bronze, it provides excellent durability and performance in various industrial settings. Ideal for supporting rotating or sliding shafts, this bearing ensures smooth operation and longevity.

General Specifications

Product Type	Plain Bearing
Shaft Diameter	0.18 in

Mechanical Specifications

Length	1/4 in
Material	Sintered Bronze
Outside Diameter	0.31 in
