## Bearing fitting tool TMFT 33

Application
The fitting tool TMFT 33 is designed for quick, precise and safe mounting of bearings with bore diameters from 10 to 50 mm ( $0.39-1.96 \mathrm{in}$ ). It can also be used to mount bushings, seal rings, belt pulleys etc.

## Description

The kit consists of 33 impact rings, three high-strength aluminium sleeves and a dead-blow hammer with nylon faces. The rings as well as the impact surfaces of the sleeves are made of a super-tough acetal resin, giving high mechanical strength and impact fatigue resistance at a very low weight.
The hammer is steel-shot loaded for maximum impact. The fibreglass handle, with comfortable rubber-grip for good handling, absorbs shock and vibration. All parts are clearly arranged in a
practical transport case.
A selection chart is included.

Selection chart TMFT 33

| Sleeves | Rings | SKF bearing series |  |  |  |  |  |  |  |  |
