RS PRO 4L PE Heavy Duty Funnel

RS Stock No.: 672-497

RS Professionally Approved Products bring to you professional quality parts across all product categories. Our product range has been tested by engineers and provides a comparable quality to the leading brands without paying a premium price.

Product Description

RS PRO PE Industrial Heavy-Duty Funnel, 4.0L

Polyethylene, known as PE, is a widely used material due to its versatility and exceptional properties, such as lightweight; still, super-strong, resistant, long-lasting and is easily moulded. No surprises as to why Plastic Funnel fits naturally to properties of the PE material.

We are proudly introducing our own branded RS PRO Industrial Heavy-Duty Plastic Funnel, ideal to avoid messy liquid spills and to fill oil, water, acid and even fuel into a container or utensils. Our orange, heavy-duty Funnel is a precision and anti-spillage tool. The Funnel offers a wide opening to allow a different kind of substances to be poured in with ease. Whilst the narrow tip will enable you to pour into more nuanced spaces precisely.

Funnels – Heavy Duty

Range of heavy duty plastic funnels which will not break in cold weather
Resistant to oils and chemicals
