

# PAC500 **PLUS**

MANUAL 'GO-NO-GO' TESTER

## Simple, easy-to-use Electrical Safety Checker

The PAC500 Plus is an enhanced manual 'go-no-go' Portable Appliance Checker. The unit is a hand-held instrument, ideal for service applications, that performs fundamental safety checks on Class I and Class II equipment and provides neon Pass/Fail indication. The unit checks the electrical safety of both Portable Appliances and Leads.

The PAC500 Plus is simple to use. The results of the check are shown instantly in the form of Pass/Fail illumination. The unit performs Insulation and Earth Continuity checks simultaneously. The checker automatically measures and compares the test results to pre-set pass levels and the Pass/Fail neons are lit accordingly.

### SPECIFICATIONS

#### EARTH CONTINUITY TEST

Test current up to 25A AC,  
Pass level 0.35Ω

#### INSULATION

500V DC +10%,  
Pass level 2MΩ

#### DIMENSIONS

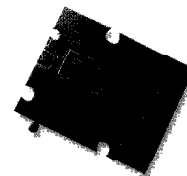

180mm x 90mm x 40mm

#### WEIGHT

700g

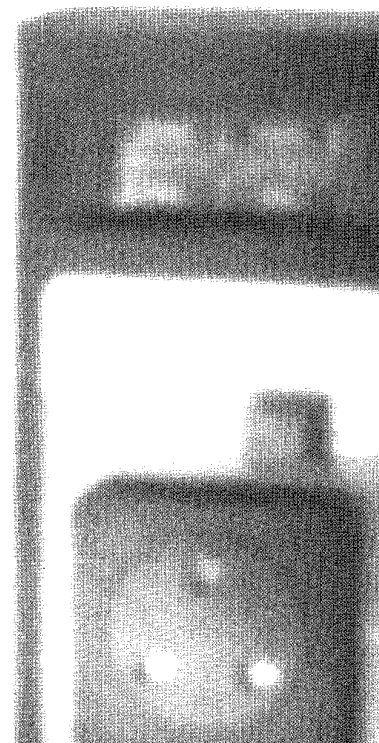

Hand-held  
Extremely Lightweight

Performs Lead Polarity Test

### **PLUS** FEATURES

- Simple, easy to use Electrical Safety Checker
- Earth Continuity and Insulation Tests
- Checks electrical safety of Portable Appliances and Leads - to make the test process as convenient as possible
- Performs Lead Polarity Test - extending the test capability range to include leads as well as appliances
- Lightweight (weights only 700g)
- Hand-held - for convenience
- Supplied with all necessary test leads and carry case

PAC500 **PLUS** Part Number: 159A951
